

Mr. Alvaro Llobet
Blockchain & crypto specialist

Entrepreneur, investor and expert advisor in Blockchain technologies since 2015.

Manager at tech consultancy firm Blockchain Atraure (2014-2018). Has been helping to implement this technology within the company's processes and studying the environment of this technology since 2014.

Alvaro is an expert on a vast number of Blockchains including NEM where he was part of the team of developers of the Landstead project (2016), one of the first land and property registers on this environment.

He has been working with large and medium companies and advising some of the top-listed companies (IBEX), focused on the combination with real situations and processes, and has a broad knowledge of the Blockchain environment both nationally and internationally.

Currently enrolled at the *MSC in the digital currency* at Nicosia University, Chipre, he continues to study, explore and apply all the aspects that involve the Blockchain: Legal, scalability, financial and most core tech functionalities.
